

Dr. T. Everett Ellis

CONTACT INFORMATION	525 Madison Place SE Albuquerque, NM 87108	<i>Phone:</i> +1-512-814-8304 <i>Email:</i> t.everett.ellis@gmail.com <i>LinkedIn:</i> teverettellis
SUMMARY OF QUALIFICATIONS	Computational scientist with a background in aerospace engineering and an emphasis on fluid dynamics and shock physics. Exposure to a variety of simulation domains including solid mechanics, wave propagation, electromagnetics, heat transfer, and plasma physics. Experience running commercial CFD solvers as well as developing research codes for a wide range of flow domains. Well developed programming and development skills with an affinity for clean, elegant solutions. Comfortable with both spoken and written communication skills with a keen interest in project management and team dynamics.	
PROFESSIONAL EXPERIENCE	Postdoctoral Scientist – <i>Plasma Physics</i> 2016 to present Electromagnetic Theory Group , Sandia National Laboratory <ul style="list-style-type: none">• Took leadership of project management roles including running code review meetings and developing a hybrid Scrum/Kanban agile development process.• Attended seminars, workshops, and classes on leadership, project management, and communication.• Performed electromagnetic simulations of radar cross-sections using commercial and research software as part of a code verification study.• Developed a highly scalable plasma physics code using the Trilinos Project.• Contributed to a test harness for stochastic simulation codes using a new theory of stochastic Richardson extrapolation implemented in Python.• Involvement with experimental analysis of electromagnetic pulses. Graduate Research Assistant – <i>Stabilized Finite Elements</i> 2010 to 2016 Institute for Computational Engineering and Sciences , University of Texas at Austin <ul style="list-style-type: none">• Organized and lead group meetings.• Frequently presented research at national and international meetings.• Developed space-time discontinuous Petrov-Galerkin finite element methods for fluid flow applications.• Implemented a conservative formulation of DPG through Lagrange multipliers.• Contributed significantly to Camellia, a parallel C++ library built on Trilinos for rapid development of DPG formulations. Graduate Student Researcher – <i>Shock Hydrocodes</i> 2008 to 2013 Institute for Scientific Computing Research , Lawrence Livermore National Laboratory <ul style="list-style-type: none">• Took initiative in developing new features and research directions.• Worked in a small research group developing advanced finite element discretization methods for Lagrangian hydrodynamics.• Improved staggered grid hydro algorithms in multi-material Arbitrary Lagrangian Eulerian codes.• Prototyped code in Matlab to explore the benefits of high order finite elements.• Extended the C++ shock physics code Blast to axisymmetric problems.• Developed a Python-scriptable plotting tool to interface with Blast.• Implemented a smoothness indicator to isolate artificial viscosity to shocked and underresolved flow regions.• Contributed to open source MFEM finite element library.	

Undergraduate Student Researcher – Shock Tube Experiments Summer 2007
 Research Experience for Undergraduates, Aerospace Engineering,
 University of Illinois at Urbana-Champaign

- Designed a series of experiments and set up a lab to study the Mount St. Helens lateral blast.
- Developed CAD designs of experimental apparatus and assisted with assembly.
- Performed numerical predictions of experimental results.

EDUCATION

The University of Texas, Austin

GPA: 3.92

Ph.D. Computational Science Engineering and Mathematics, April 2016

- Thesis Topic: *Space-time Discontinuous Petrov-Galerkin Finite Elements for Transient Computational Fluid Dynamics*
- Advisors: Leszek Demkowicz, Robert Moser

California Polytechnic State University, San Luis Obispo

GPA: 3.93

M.S. Aerospace Engineering, June 2010

- Thesis Topic: *High Order Finite Elements for Lagrangian Computational Fluid Dynamics*
- Advisors: Tzanio Kolev, Robert Rieben, Faysal Kolkailah
- *Summa cum Laude*, With Highest Honors in Engineering

B.S. Aerospace Engineering, June 2010

- Aeronautics specialization
- *Summa cum Laude*, With Highest Honors in Engineering

SOFTWARE SKILLS

Computer Programming:

- C++, Python, Lua, MATLAB, Mathematica, and others

Scientific Computing Libraries:

- Trilinos, FEniCS, libMesh, MFEM, NumPy, SciPy, and others

CFD / Engineering Software:

- Fluent, Gambit, SolidWorks, Pro/ENGINEER, and others

SELECTED
CONFERENCES
AND WORKSHOPS

- NM EPSCoR Post-Doc Leadership Workshop, January 2017 – La Joya, NM
- Minimum Residual and Least Squares Finite Element Methods Workshop, November 2015 – Delft, The Netherlands
- Minimum Residual and Least Squares Finite Element Methods Workshop, November 2013 – Austin, TX
- Advanced Numerical Methods in the Mathematical Sciences, May 2015 – College Station, TX
- Parallel CFD, May 2014 – Trondheim, Norway
- MultiMaterial Hydrodynamics Conference, September 2013 – San Francisco, CA
- U.S. National Congress on Computational Mechanics, July 2015 – San Diego, CA
- U.S. National Congress on Computational Mechanics, July 2013 – Raleigh, NC
- U.S. National Congress on Computational Mechanics, July 2011 – Minneapolis, MN
- Finite Element Rodeo, February 2016 – College Station, TX
- Finite Element Rodeo, February 2015 – Dallas, TX
- Finite Element Rodeo, February 2014 – Austin, TX
- Finite Element Rodeo, February 2013 – Baton Rouge, LA
- Conference on Analysis of Partial Differential Equations, December 2013 – Lake Buena Vista, FL

PROFESSIONAL
DEVELOPMENT

- How to Effectively Mentor as a PI/Team Lead – Sandia, 2017
- EPSCoR Post-Doc Leadership Workshop – Sandia, 2017

AWARDS AND
HONORS

- Awarded Computational Applied Math Fellowship – UT Austin, 2010 - 2014
- Graduated *Summa cum Laude* – Cal Poly, 2010
- Elected to President’s Honors List – Cal Poly, 2005 - 2007
- Elected to Dean’s List – Cal Poly, 2005 - 2008
- Litton Industries in Engineering Scholarship – Cal Poly, 2007 - 2008
- Accenture Outstanding AERO Award – Cal Poly, 2007
- Reinhold Aerospace Engineering Scholarship – Cal Poly, 2007
- Elected to Dean’s List – Ventura College, 2002 - 2005
- Howe Heywood Mathematics Prize – Ventura College, 2005
- James and Ida Iliff Memorial Scholarship – Ventura College, 2005
- Alexis Dember Scholarship – Ventura College, 2005
- Alpha Gamma Sigma Scholastic and Service Award – Ventura College, 2003

RESEARCH
INTERESTS

Computational fluid dynamics, shock physics, multi-phase flows, turbulence modeling, finite element methods, Lagrangian hydrocodes, computational plasma dynamics, magnetohydrodynamics, computational mechanics
