

## Dr. T. Everett Ellis

---

CONTACT INFORMATION	525 Madison Place SE Albuquerque, NM 87108	<i>Phone:</i> +1-512-814-8304 <i>Email:</i> <a href="mailto:t.everett.ellis@gmail.com">t.everett.ellis@gmail.com</a> <i>LinkedIn:</i> <a href="#">teverettellis</a>
------------------------	---	---

SUMMARY OF QUALIFICATIONS	Computational scientist with a background in aerospace engineering and an emphasis on advanced numerical methods. Exposure to a variety of simulation domains including solid mechanics, electromagnetics, heat transfer, and plasma physics. Experience running commercial CFD/CAE solvers as well as developing research codes for a wide range of applications. Well developed programming and development skills (C++ and Python) with an affinity for clean, elegant solutions. Excellent spoken and written communication skills with a keen interest in project management and team dynamics.
------------------------------	--

PROFESSIONAL EXPERIENCE	<b>Postdoctoral Scientist</b> – <i>Plasma Physics</i> 2016 to present <a href="#">Electromagnetic Theory Group</a> , <a href="#">Sandia National Laboratory</a>
----------------------------	---

- Took leadership of project management roles including running code review meetings and developing a hybrid Scrum/Kanban agile development process.
- Attended seminars, workshops, and classes on leadership, project management, and communication.
- Performed electromagnetic simulations of radar cross-sections using commercial and research software as part of a code verification study.
- Developed a highly scalable plasma physics code using the [Trilinos Project](#).
- Contributed to a test harness for stochastic simulation codes using a new theory of stochastic Richardson extrapolation implemented in Python.
- Involvement with experimental analysis of electromagnetic pulses.

	<b>Graduate Research Assistant</b> – <i>Stabilized Finite Elements</i> 2010 to 2016 <a href="#">Institute for Computational Engineering and Sciences</a> , <a href="#">University of Texas at Austin</a>
--	--

- Organized and lead group meetings.
- Frequently presented research at national and international meetings.
- Developed space-time discontinuous Petrov-Galerkin finite element methods for fluid flow applications.
- Implemented a conservative formulation of DPG through Lagrange multipliers.
- Contributed significantly to [Camellia](#), a parallel C++ library built on Trilinos for rapid development of DPG formulations.

	<b>Graduate Student Researcher</b> – <i>Shock Hydrocodes</i> 2008 to 2013 <a href="#">Institute for Scientific Computing Research</a> , <a href="#">Lawrence Livermore National Laboratory</a>
--	--

- Took initiative in developing new features and research directions.
- Worked in a small research group developing advanced finite element discretization methods for Lagrangian hydrodynamics.
- Improved staggered grid hydro algorithms in multi-material Arbitrary Lagrangian Eulerian codes.
- Prototyped code in Matlab to explore the benefits of high order finite elements.
- Extended the C++ shock physics code [Blast](#) to axisymmetric problems.
- Developed a Python-scriptable plotting tool to interface with Blast.
- Implemented a smoothness indicator to isolate artificial viscosity to shocked and under-resolved flow regions.
- Contributed to open source [MFEM](#) finite element library.

**Undergraduate Student Researcher – Shock Tube Experiments** Summer 2007  
 Research Experience for Undergraduates, Aerospace Engineering,  
 University of Illinois at Urbana-Champaign

- Designed a series of experiments and set up a lab to study the Mount St. Helens lateral blast.
- Developed CAD designs of experimental apparatus and assisted with assembly.
- Performed numerical predictions of experimental results.

## EDUCATION

**The University of Texas**, Austin

**GPA: 3.92**

Ph.D. Computational Science Engineering and Mathematics, April 2016

- Thesis Topic: *Space-time Discontinuous Petrov-Galerkin Finite Elements for Transient Computational Fluid Dynamics*
- Advisors: Leszek Demkowicz, Robert Moser

**California Polytechnic State University**, San Luis Obispo

**GPA: 3.93**

M.S. Aerospace Engineering, June 2010

- Thesis Topic: *High Order Finite Elements for Lagrangian Computational Fluid Dynamics*
- Advisors: Tzanio Kolev, Robert Rieben, Faysal Kolkailah
- *Summa cum Laude*, With Highest Honors in Engineering

B.S. Aerospace Engineering, June 2010

- Aeronautics specialization
- *Summa cum Laude*, With Highest Honors in Engineering

## REFEREED JOURNAL PUBLICATIONS

T.E. Ellis, J. Chan, and L. Demkowicz (2016),  
 Robust DPG Methods for Transient Convection-Diffusion.  
*Lecture Notes in Computational Science and Engineering*,  
 doi:10.1007/978-3-319-41640-3\_6

T.E. Ellis, and L. Demkowicz (2014),  
 Locally Conservative Discontinuous Petrov-Galerkin Finite Elements for Fluid Problems.  
*Computers & Mathematics with Applications*, doi:10.1016/j.camwa.2014.07.005

V. Dobrev, T.E. Ellis, Tz. Kolev and R. Rieben (2012),  
 High-order Curvilinear Finite Elements for Axisymmetric Lagrangian Hydrodynamics.  
*Computers & Fluids*, doi:10.1016/j.compfluid.2012.06.004

V. Dobrev, T.E. Ellis, Tz. Kolev and R. Rieben (2011),  
 Curvilinear Finite Elements for Lagrangian Hydrodynamics.  
*International Journal for Numerical Methods in Fluids*, doi:10.1002/fld.2366

## SOFTWARE SKILLS

### Computer Programming:

- C++, Python, Lua, MATLAB, Mathematica, and others

### Scientific Computing Libraries:

- Trilinos, FEniCS, libMesh, MFEM, NumPy, SciPy, and others

### CFD / Engineering Software:

- Fluent, Gambit, SolidWorks, Pro/ENGINEER, and others

SELECTED  
CONFERENCES  
AND WORKSHOPS

- New Mexico EPSCoR Post-Doc Leadership Workshop,  
January 2017 – La Joya, NM
- Minimum Residual and Least Squares Finite Element Methods Workshop,  
November 2015 – Delft, The Netherlands
- Minimum Residual and Least Squares Finite Element Methods Workshop,  
November 2013 – Austin, TX
- Advanced Numerical Methods in the Mathematical Sciences,  
May 2015 – College Station, TX
- Parallel CFD, May 2014 – Trondheim, Norway
- MultiMaterial Hydrodynamics Conference, September 2013 – San Francisco, CA
- U.S. National Congress on Computational Mechanics, July 2015 – San Diego, CA
- U.S. National Congress on Computational Mechanics, July 2013 – Raleigh, NC
- U.S. National Congress on Computational Mechanics, July 2011 – Minneapolis, MN
- Finite Element Rodeo, February 2016 – College Station, TX
- Finite Element Rodeo, February 2015 – Dallas, TX
- Finite Element Rodeo, February 2014 – Austin, TX
- Finite Element Rodeo, February 2013 – Baton Rouge, LA
- Conference on Analysis of Partial Differential Equations,  
December 2013 – Lake Buena Vista, FL

PROFESSIONAL  
DEVELOPMENT

- How to Effectively Mentor as a PI/Team Lead – Sandia, 2017
- Agile for Research and Development – Sandia, 2017
- Life of an Idea – Sandia, 2017
- New Mexico EPSCoR Post-Doc Leadership Workshop – Sandia, 2017

AWARDS AND  
HONORS

- Awarded Computational Applied Math Fellowship – UT Austin, 2010 - 2014
- Graduated *Summa cum Laude* – Cal Poly, 2010
- Elected to President’s Honors List – Cal Poly, 2005 - 2007
- Elected to Dean’s List – Cal Poly, 2005 - 2008
- Litton Industries in Engineering Scholarship – Cal Poly, 2007 - 2008
- Accenture Outstanding AERO Award – Cal Poly, 2007
- Reinhold Aerospace Engineering Scholarship – Cal Poly, 2007
- Elected to Dean’s List – Ventura College, 2002 - 2005
- Howe Heywood Mathematics Prize – Ventura College, 2005
- James and Ida Iliff Memorial Scholarship – Ventura College, 2005
- Alexis Dember Scholarship – Ventura College, 2005
- Alpha Gamma Sigma Scholastic and Service Award – Ventura College, 2003

RESEARCH  
INTERESTS

Computational fluid dynamics, shock physics, multi-phase flows, turbulence modeling, finite element methods, Lagrangian hydrocodes, computational plasma dynamics, magnetohydrodynamics, computational mechanics
