SUMMARY OF QUALIFICATIONS

Ph.D. in computational science, engineering, and mathematics with a background in aerospace engineering and an emphasis on advanced numerical methods for fluid simulations. Exposure to a variety of simulation domains including solid mechanics, electromagnetics, heat transfer, and plasma physics. Experience running commercial CFD/CAE solvers as well as developing research codes for a wide range of applications. Well developed programming and development skills (C++ and Python) with an affinity for clean, elegant solutions. Excellent spoken and written communication skills with a keen interest in project management and team dynamics.

PROFESSIONAL EXPERIENCE

Postdoctoral Scientist – *Computational Plasma Physics* 2016 to present
[Electromagnetic Theory Group](#),
[Sandia National Laboratories](#), operated by [Honeywell International](#)

- Developing a highly scalable plasma physics code using the [Trilinos Project](#).
- Performed electromagnetic simulations of radar cross-sections using commercial and research software as part of a code verification study.
- Contributed to a test harness for stochastic simulation codes using a new theory of Richardson extrapolation implemented in Python.
- Involvement with experimental analysis of electromagnetic pulses.
- Took leadership of project management roles including running code review meetings and developing a customized Kanban based agile development process.

Graduate Research Assistant – *Advanced FEM for Fluids* 2010 to 2016
[Institute for Computational Engineering and Sciences](#),
[University of Texas at Austin](#)

- Developed space-time discontinuous Petrov-Galerkin finite element methods for fluid flow applications.
- Designed and implemented a conservative DPG formulation through Lagrange multipliers.
- One of the primary developers of [Camellia](#), a parallel C++ library built on Trilinos for rapid development of DPG simulations.
- Contributed to open source [libMesh](#) finite element library.
- Organized and lead group meetings.
- Frequently presented research at national and international meetings.

Graduate Student Researcher – *Shock Hydrocodes* 2008 to 2013
[Institute for Scientific Computing Research](#),
[Lawrence Livermore National Laboratory](#)

- Worked in a small research group developing advanced finite element discretization methods for Lagrangian hydrodynamics.
- Improved staggered grid hydro algorithms in multi-material Arbitrary Lagrangian Eulerian codes.
- Prototyped code in Matlab to explore the benefits of high order finite elements.
- Extended the C++ shock physics code [Blast](#) to axisymmetric problems.
- Implemented a smoothness indicator to isolate artificial viscosity to shocked and under-resolved flow regions.
- Developed a Python-scriptable plotting tool to interface with Blast.
- Contributed to open source [MFEM](#) finite element library.
- Took initiative in developing new features and research directions.

	<p>Undergraduate Student Researcher – Shock Tube Experiments Summer 2007</p> <p>Research Experience for Undergraduates, Aerospace Engineering, University of Illinois at Urbana-Champaign</p> <ul style="list-style-type: none"> Designed a series of experiments and set up a lab to study the Mount St. Helens lateral blast. Developed CAD designs of experimental apparatus and assisted with assembly. Performed numerical predictions of experimental results. 	
EDUCATION	<p>The University of Texas, Austin</p> <p>Ph.D. Computational Science Engineering and Mathematics, April 2016</p> <ul style="list-style-type: none"> Thesis Topic: <i>Space-time Discontinuous Petrov-Galerkin Finite Elements for Transient Computational Fluid Dynamics</i> Advisors: Leszek Demkowicz, Robert Moser <p>California Polytechnic State University, San Luis Obispo</p> <p>M.S. Aerospace Engineering, June 2010</p> <ul style="list-style-type: none"> Thesis Topic: <i>High Order Finite Elements for Lagrangian Computational Fluid Dynamics</i> Advisors: Tzanio Kolev, Robert Rieben, Faysal Kolkailah <i>Summa cum Laude</i>, With Highest Honors in Engineering <p>B.S. Aerospace Engineering, June 2010</p> <ul style="list-style-type: none"> Aeronautics specialization <i>Summa cum Laude</i>, With Highest Honors in Engineering 	<p>GPA: 3.92</p> <p>GPA: 3.93</p>

SELECTED
CONFERENCES
AND WORKSHOPS

- New Mexico EPSCoR Post-Doc Leadership Workshop, January 2017 – La Joya, NM
- Minimum Residual and Least Squares Finite Element Methods Workshop, November 2015 – Delft, The Netherlands
- Minimum Residual and Least Squares Finite Element Methods Workshop, November 2013 – Austin, TX
- Advanced Numerical Methods in the Mathematical Sciences, May 2015 – College Station, TX
- Parallel CFD, May 2014 – Trondheim, Norway
- MultiMaterial Hydrodynamics Conference, September 2013 – San Francisco, CA
- U.S. National Congress on Computational Mechanics, July 2015 – San Diego, CA
- U.S. National Congress on Computational Mechanics, July 2013 – Raleigh, NC
- U.S. National Congress on Computational Mechanics, July 2011 – Minneapolis, MN
- Finite Element Rodeo, February 2016 – College Station, TX
- Finite Element Rodeo, February 2015 – Dallas, TX
- Finite Element Rodeo, February 2014 – Austin, TX
- Finite Element Rodeo, February 2013 – Baton Rouge, LA
- Conference on Analysis of Partial Differential Equations, December 2013 – Lake Buena Vista, FL

PROFESSIONAL
DEVELOPMENT

- How to Effectively Mentor as a PI/Team Lead – Sandia, 2017
- Agile for Research and Development – Sandia, 2017
- Life of an Idea – Sandia, 2017
- New Mexico EPSCoR Post-Doc Leadership Workshop – Sandia, 2017

AWARDS AND
HONORS

- Awarded Computational Applied Math Fellowship – UT Austin, 2010 - 2014
- Graduated *Summa cum Laude* – Cal Poly, 2010
- Elected to President’s Honors List – Cal Poly, 2005 - 2007
- Elected to Dean’s List – Cal Poly, 2005 - 2008
- Litton Industries in Engineering Scholarship – Cal Poly, 2007 - 2008
- Accenture Outstanding AERO Award – Cal Poly, 2007
- Reinhold Aerospace Engineering Scholarship – Cal Poly, 2007
- Elected to Dean’s List – Ventura College, 2002 - 2005
- Howe Heywood Mathematics Prize – Ventura College, 2005
- James and Ida Iliff Memorial Scholarship – Ventura College, 2005
- Alexis Dember Scholarship – Ventura College, 2005
- Alpha Gamma Sigma Scholastic and Service Award – Ventura College, 2003

RESEARCH
INTERESTS

Computational fluid dynamics, shock physics, multi-phase flows, turbulence modeling, finite element methods, Lagrangian hydrocodes, computational plasma dynamics, magnetohydrodynamics, computational mechanics
